

ParentPay has the option of adding funds to your parent account to be used any time. This works similar to a PayPal account.

You can use the funds to pay for any items at any time without having to type in card details or add cards every time you pay for things.

In order to add funds to your account click “Parent Account” tab at the top left

Click the button shown called “Add parent account credit”

Enter the amount you wish to add to your parent account either with the pre-defined amounts or by entering your own amount.

Then click either Visa Pay if you have it and wish to use it, otherwise click other payment method to pay by card.

Follow the instructions to finish adding the funds to your account
